Dear FDA,

This is concerning your proposed rule and guidance on genetically engineered foods.

Voluntary labeling and notification are inadequate protection for the environment and my health.

I want to know what is in my food and I have a right to know.

All genetically engineered foods should be labeled and should not be assumed safe. They should be subject to pre-market safety testing.

There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment!
